

Baum-, Strauch-, Staudengewächs- und einjährigem Pflanzen-Saamen

gesammelt in diesen und den verflossenen Jahre

in
Guatemala, San-Salvador, Honduras, Nicaragua, Mosquitos, Equador, Veragua, Chiriqui,

aus welchem letzteren Staate noch nie Saamen nach Europa gekommen sind.

Sämmtliche Saamen sind nur von ansehnlichen, schönen Gewächsen, welche sich zu Zierpflanzen eignen. Viele sind Prachtpflanzen, die eine Cultur reich belohnen werden. Alle habe ich selbst in Flor stehen gesehen, und habe ich die Mühe eines strapazierten Rückweges nicht gescheut, um nach mehreren Specieen existieren in Europa nur tod in Herbarien, keine wird noch in unsern Gärten cultivirt. — Für treffliche Conservation der Saamen während der Landreisen habe ich gesorgt, ebenso wie ich auch dieselben während der Seereise vor Feuchtigkeit & meiner Cajüte zu schützen gewusst habe, so dass ich dieselben als gut und keimfähig empfehlen kann. — Ohne anmassend zu sein, darf ich behaupten, dass Europa noch nie eine grössere Sammlung empfangen hat, die meineinige, sowohl in Beziehung der Blütenfarben und Form oder der Schönheit der Blätter und des ganzen Habitus, als auch in Rücksicht der Grösse der Territoriums, auf welchem dieselben einheimisch sind, da me. Excursionen, den Zügen der Cordilleren folgend, sich von 20° n. Br. bis 20° s. Br., von 95° bis 75° westl. L. von Greenwich erstreckten. — Wegen der vielen neuen Species bitte ich die Nummern des Katalogs anzumerken, da dieselben gegenwärtig durch die Freundlichkeit eines ausgezeichneten, mir befreundeten Botanikers, des Herrn Dr. Klotzsch, bestimmt werden, wonach dieselben späterhin leicht benannt und bestätigt werden können. Ebenso ist die stets angegebene Überwinterungstemperatur bei der Cultur nicht zu übersehen. — Aufträge und Gelder erbitte ich franco unter der Adresse des Herrn H. Brunnow, Post-Secretair in Berlin; wo indessen der Betrag nicht baar beigefügt ist, werde ich denselben durch Postvorschuss entnehmen. Berlin, im Juni 1850.

J. v. Warszewicz.
